Reasons for allowance

1. The following is an examiner's statement of reasons for allowance:
2. Claims 1-9, and 19-28 are allowed in response to applicant's persuasive arguments.
3. The following is an examiner's statement of reasons for allowance: None of the prior art teach or suggest a method for connecting two locations on a network utilizing a pointing device a the first location interconnected to a user's computer at the second location comprising the steps of: the input device can sense both position data of an external surface that is related to an optical indicator on a user display associated with the first computer to indicated the relative position on of the input device to the external surface when the first application program in running in the foreground, and detect optical indicia of the product from displayed indicia on an external optical indicia surface containing a product ID in combination of detecting the optical indicia associated with the product information access program, the product information access program operable to access a second computer disposed on the network in response to the detection of the optical indicia of the product with the input device, performing a lookup operation at the second computer to match the product ID with routing information of each of a plurality of vendor
